## PRIMER FOR FIX ALL GLUES

- For the treatment of nonpopular surface (e.g. polyethylene, polypropylene, PTFE)
- Usable on a wide range of difficult surfaces
- Excellent strength

## General Information

FIX ALL PRIMER is a solvent based primer for the treatment of nonpopular surfaces such as polyethylene, polypropylene or PTFE.

With FIX ALL PRIMER difficult surfaces can be bonded with any FIX ALL glue.

## Technical Information

Chemical base: aliphatic solvent

Colour: colourless

Form: aerosol

Odour: characteristic

Density (at 20°C): 0,7 g/cm<sup>3</sup>

Viscosity: < 20 mPas

Flash point: -10°C (DIN 55213)

Shelf life: 12 months at room temperature

Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50°C. Do not pierce or burn, even after use.

Buildup of explosive mixtures possible without sufficient ventilation.

## Application and Use

1. Clean the surface thoroughly.
2. Fix All Primer should be applied to a clean, lint-free cloth / paper / sponge and the surface should be wetted with it.
3. ATTENTION: Before the adhesive is applied, the solvent must be completely evaporated!
4. ATTENTION: There should not be more than an hour between applying the primer and applying the adhesive.
5. ATTENTION: If only one part to be joined is made of non-polar plastic, only this must be treated with primer. In this case, the adhesive should be applied to the untreated surface.
6. Load the bond only after the final strength has been reached.
