

FIT

Fiber Tape

HIGH PERFORMANCE FIBER TAPE

- Extremely wear-resistant against abrasion
- Superb resistance to tape curl
- Due to high tack adhesive it adheres to a wide variety of substrates
- Easy to apply and hand tears in rectangular lines
- Moisture resistant and does not absorb water
- Easy to write on

General Information

FIBER TAPE is premium grade 70 mesh TAPE with an aggressive adhesive formula.

FIBER TAPE makes it suitable for repairing and construction work, etc.

Technical Information

Adhesive: Natural rubber-synthetic resin blend
Base material: Woven cloth/polyester with polyethylene coating
Colours: black, silver
Liner: No liner
Adhesion to steel: 9,8 N/25 mm
Tensile strength: 161,8 N/25 mm

Thickness: 0,3 mm
Service temperature range: -15°C to +50°C
Elongation max: 11,5%
Mesh: 70
UV resistance: Limited
Clean and dry in a well ventilated area, preferably at a temperature between +10°C and +30°C.

Application and Use

- **APPLICATION:**
Automotive, aerospace, military, general industrial, MRO, facilities management, transportation, marine, commercial vehicle, RV, bus, truck, ship yards, metal working, furniture, electronics, solar, trailer manufacturing and woodworking.
Lane marking, floor marking, safety coding, hazard marking, identifying, sealing, color coding, bundling, holding, reinforcing, identifying, tabbing, wrapping, splicing and protecting.
- **USE:**
Temperature: between -5°C and +35°C. Surface must be clean and free from dust and grease. Avoid touching the tapes exposed adhesive surface in order to keep full adhesive performance. Pressure sensitive adhesive must be applied with a maximum of pressure in order to achieve maximum pressure level. The indicated level of performance will be reached after a bonding period of 24h at +23°C
