## Power Tape

### MOST VERSATILE REPAIR TAPE

- UV-resistant
- Permanent waterproof - airtight
- Usable under water
- Resist fuels, oil, acids, solvents and salt
- Flexible up to 300%
- Pressure resistant up to 8 bar
- Insulates 8.000 Volts
- Temperature resistance from -65°C to +260°C

### Notice

All information including images are given with the greatest care. Still, it is appropriate to users regardless of the test the suitability of each product for their own purposes. Xintex is not liable for the completeness and accuracy of information and refuses warranty for your specific use. The guarantee, which Xintex products provide, relates only to the standard conditions of sale of this product. In no case Xintex can be held responsible for incidental damages, or damages for improper use or sale of the product to another customer.

### General Information

POWER TAPE is the most versatile repair tape for emergencies and all-purpose repairs. Just by stretching and wrapping it around an object onto itself, it will quickly and easily create a permanent airtight,

waterproof seal in just seconds! It can even be used on dirty and wet surfaces. It will remain flexible and not become brittle after being exposed to sunlight. POWER TAPE is easy to remove and leaves no residues.

### Technical Information

Colour: transparent; coloured  
Temperature range: -65°C to +260°C  
Brittle point: -65°C (ASTM D-2137)  
Flash point: 260°C  
Hardness: 50 Shore A  
Relative density: 1.15

Tensile strength: 700psi (ASTM D-412)  
Elongation at tear: 300% (ASTM D-412)  
Pressure resistance: 10 Bar (maximum)  
Safety measures: Consult the Safety Data Sheet

### Application and Use

- **APPLICATION:**  
POWER TAPE saves time and money by securing, protecting or repairing almost anything,, everywhere and in any condition. Use it on electrical wires as shrink-tube, protect tool handles, connectors, fittings. For cable bundling and rope-end protection, anti slip coatings, safety and color-marking etc. It is perfect for boats, cars, trucks, caravans/campers, aircrafts, agriculture industry, plumbing, military, general industry, rescue teams.
- **Use:**
  - Unwind POWER TAPE and remove the plastic liner from tape.
  - Wrap POWER TAPE around the object by stretching and overlapping one layer. Press for good bonding.
  - For high pressure leaks stretch to maximum (at least 300 %). The tighter the tape is wrapped, the quicker and stronger it will fuse.
