- Document case on the inside of the door
- Lockable by 2-way push rod cylinder lock with turning handle, incl. 2 keys for safe storage
- Complies with the requirements for the storage of highly flammable media, alkalis, acids, cleaners, adhesives etc.

General Information

Storing hazardous goods like acids, alkalis and many other can be quite a challenge without the right equipment. SECURITY LOCKER is your easy way to create a safe work environment in your company. SECURITY LOCKER has a robust steel body with a high-quality powder coating. Inside there are 4 liquid-tight shelves with welded corners which prevent the release of hazardous liquids. Each shelf has a collecting volume of 15 litres. Depending on your requirements, the shelves can be adjusted in intervals of 25mm.
The doors of the cabinet are reinforced which makes it resistant against external impacts. The plastics buffers provide a silent closing of the doors and the diamond perforation offers excellent ventilation. SECURITY LOCKER is lockable with a 2-way push rod cylinder lock with 2 keys. With all its features SECURITY LOCKER complies with the requirements for the storage of dangerous goods and is therefore the ideal addition in your workshop.
